- Minimum Investment: On Request

About Franchise

YEARS OF EXPERIENCE: 2012 WORKING ONLY ON 100% NATURAL & ORGANIC AGRICULTURAL SOLUTIONS. PRODUCTS ARE RESEARCHED & DEVELOPED ON THE BASIS OF 500 YEAR'S OLD INDIGENOUS TECHOLOGY. WE HAVE TRAINED AND GUIDED 1000'S OF FARMERS ON ORGANIC FARMING AND EVERY SINGLE FARMER HAS EXCELLED IN THEIR FIELD. WE HAVE BEEN SUCCESSFULL IN BRINGING OUT THE BEST RESULTS ON ALMOST ALL CROPS. WE HAVE BEEN SUCCESSFULL IN OVERTHROWING CHEMICAL FARMING IN TERMS OF PRODUCTION, QUALITY OF PRODUCTION & COST OF FARMING. APART FROM PRODUCTION, WE AIM TO BRING BACK NATURAL FERTILITY AND SUSTAINABILITY TO THE FARMS. We are Manufacturers and Repackers of 100% Natural & Organic Plant food from different extracts of Trees, Herbs and Naturally available Minerals. Since last 50 years humans have left the hand of nature and has picked the hand of chemical science and that has damaged the soil. We have forgotten that the invention of chemical science was invented just few years ago but nature has completed their 400 Cr years. Last 50 years has spoiled the established science of nature. So the first step is required to

renovate our land then think about quality or quantity. If land becomes dead or unproductive than nothing can be produce Can we produce enough to the world in organic ? : Absolutely yes ! We can produce enough quantity to feed the world, we are not just saying it, but we are doing it in our practical life. How Better (Quality): Talking about quality, Chemically used produce has already impacted the world with dangerous diseases, some of them don’t even have a cure. But in organic we can produce top quality and absolutely healthy food.
